# **SITUATION SUMMARY**

## **Triple Rail Car Derailment, SPILL: 16-2043, Heber, Imperial County**

On 04/04/16 at 0515 hours the California State Warning Center (CSWC) received a report from Union Pacific Rail Road (UPRR) advising that 3 loaded grain cars derailed upright inside a customer's facility due to a track issue. There was no release of hazardous materials and no reported injuries. Crews responded to scene to right the rail car. The CSWC made all notifications per SOP.

## **Weather of Concern**

### **Northern California**

- Temperatures will be warming as a ridge of high pressure builds over Northern California.
- Expect daytime temperatures to reach the mid to upper 80s in the valley by Wednesday

### **Southern California**

- Areas of dense fog will filter inland overnight, impacting roadways along the coast for the Monday morning commute.
- The fog and low clouds will dissipate over most areas by late Monday morning,
- A few patches of low clouds may linger at the immediate coast into Monday afternoon.

## **Cal EOC Incident – 2014 Drought**

SOC / Inland REOC remains activated in support of 2014 Drought

# Weather

## WEATHER SYNOPSIS BY REGION:

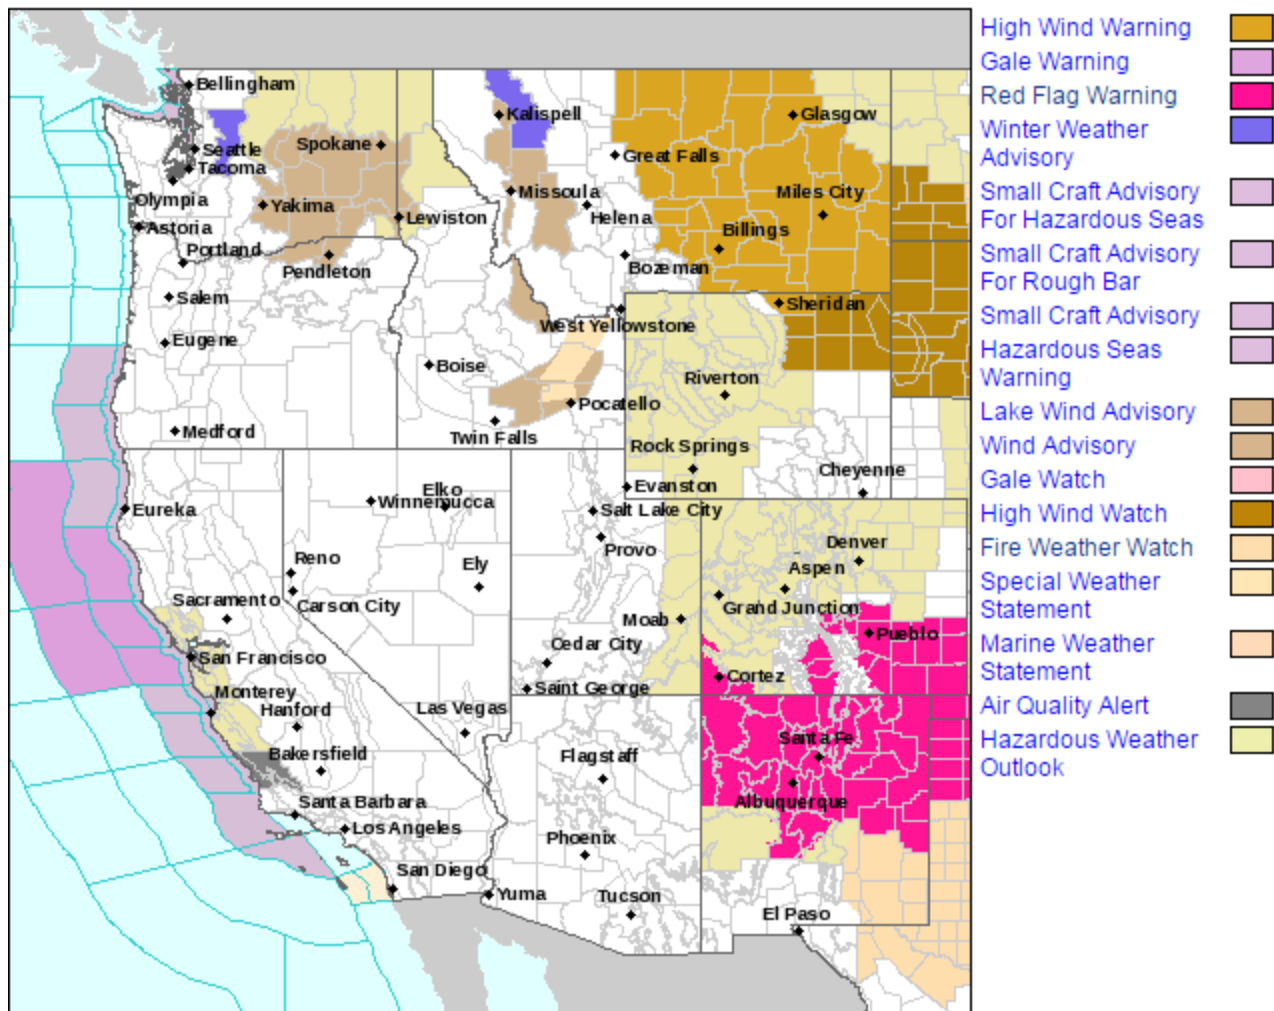

### **NORTHERN CALIFORNIA**

High pressure will be strengthening over Northern California early this week and probably reach its peak Wednesday before weakening Thursday. Rather unseasonably warm weather will be in place through mid week with the warmest inland valley areas reaching well into the 80s which is as much as 15-20 degrees above normal. The Sacramento Valley will also see moderate north to east winds prevail through mid week, possible afternoon temperatures there will be very close to 90 Wednesday. The north to east winds are expected to develop further today, reaching 10-20 mph with gusts approaching 30 mph in a few areas. Those wind speeds will become common tonight into Wednesday morning in the favored areas then decrease Wednesday afternoon to become light easterly. The high pressure ridge will begin to weaken Thursday in response to the first in a series of low pressure systems expected over Northern California for this weekend and early next week. These lows are expected to be centered mostly over South California with moisture and instability wrapping around them into Northern California. Light precipitation may begin as early as Friday afternoon in many areas with more expected throughout the weekend.

### **SOUTHERN CALIFORNIA**

A ridge of high pressure over Central and Southern California will continue to bring temperatures that are around 10 degrees above normal away from the coast today, with 60s to low 70s across the mountains and mid 70s to mid 80s in the valleys. Minimum humidity will be mainly between 15% and 30% away from the coast today. The ridge of high pressure will strengthen causing temperatures to warm to 15 to 20 degrees above normal and minimum humidity to drop into the single digits and teens Tuesday and Wednesday. Temperatures will reach the mid 90s over the warmer valley locations by Wednesday, which will be the warmest day of the week. North winds of 15 to 25 mph with gusts to 40 mph will surface across the south coast of Santa Barbara and the Grapevine tonight and then there will be northeast to east winds of 15 to 30 mph with gusts to 50 mph across the mountains and below the canyons of Southern California Tuesday night through Wednesday afternoon. An area of low pressure will approach the region from the south causing temperatures to cool to near normal and humidity to increase significantly Thursday. This low will also bring scattered showers to Southern California and the Sierra starting Thursday afternoon. A couple other low pressure areas from the west and northwest will combine with the low from the south bringing scattered showers to the entire region Friday morning through this weekend. The snow level will be around 8,000 feet. Temperatures will cool to between 5 and 10 degrees below normal Friday through this weekend.

# **CAL OES 2014 DROUGHT**

## **Cal EOC Incident – 2014 Drought**

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.

# CAL OES Missions

## Closed Cal OES Missions

- **2016-LAW22251, 04/03/16, 2130 hours,** The International Emergency Response Coordination Center (IERCC) advised of a REACH Device sounding in Kern County. The exact coordinates is 35 degrees 7 mins 34 secs N by -118 degrees 16 mins 13 secs W. Kern County Sheriff's Department (KCSD) was notified. The registered owner (r/o) of the device advised that he was out of water and had a medical condition. **Update: 04/04/16, 0100 hours,** KCSD advised that r/o of device was located, r/o was complaining of chest pain numbness to arm and leg. R/O was transported to a local medical facility. **Mission Closed**
- **2016-LAW22247, 04/03/16, 1500 hours,** The International Emergency Response Coordination Center (IERCC) advised of a SPOT Device sounding in Inyo County. The exact coordinates is 36.18932N by -117.21011W. Inyo County Sheriff's Department (ICSD) was notified. The registered owner (r/o) of the device advised of a party with a broken leg injury. **Update: 04/03/16, 1845 hours,** IERCC advised the r/o of the device contacted them and advised that they had transported the victim of the broken leg to a local medical facility. **Mission Closed**
- **2016-LAW22241, 04/03/16, 1230 hours,** The Air Force Rescue Coordination Center (AFRCC) advised of a Personal Location Beacon (PLB) sounding in San Bernardino County. The exact coordinates for the PLB is 34 degrees 44.14 N by -116 degrees 41.80 W. San Bernardino County Sheriff's Department (SBSD) were advised and responded to the scene. **Update: 04/03/16, 1545 hours,** The registered owner of the device and her husband were involved in a roll over accident. The r/o was transported to a local medical facility while her husband was pronounced deceased at the scene. **Mission Closed**

**Mission:**

We protect lives and property, build capabilities, and support our communities for a resilient California.

*We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.*
